

CO-FOUNDER NEEDED

Early Stratification of Cancer Patients

TradeScan (working title)

THE PROBLEM

Many patients with non-specific symptoms undergo extensive testing to rule out cancer. This is a huge burden both on the patients and on the health care system.

OUR SOLUTION

Based on huge amounts of patient data gathered over decades, an AI-model has been developed that can stratify patients.

PATENT STATUS

The technology is not patentable as such, but the data and the current model is kept confidential.

FINANCIAL OVERVIEW

The solution will be offered as a SaaS solution that can be made available through software integration models. Initial steps in regulatory pathway has been taken and scalability is obviously large due to the nature of the solution.

MILESTONES

Prototype with AUC of .86 developed. Currently undergoing next round with promising results. Business model reviewed up against GPs, Insurance Companies, Health care SW providers and patients.

TARGET MARKET & CUSTOMERS

It will be used in both public and private health care sectors as well as by drug development companies and private users.

CO-FOUNDER PROFILE WE ARE LOOKING FOR

Preferred qualifications

- Regulatory process MDR / IVDR
- SaaS development and scaling
- Sales to health care sector – private and public
- Start-up through forming, storming and norming

Personal fit

- Hands-on oriented
- Understanding and respecting high level of professional integrity in model development
- Patience and interest in building a sound solution over quick exit

TASKS & RESPONSIBILITIES (FIRST 3 MONTHS)

Raising necessary funds on relevant terms. Help build pitch deck and business case and reach out to potential investors. Assist in navigating case development including regulatory pathway and create initial contact to future customers.
