

CO-FOUNDER NEEDED

Personalized STEM teaching with AI

StepStudy ApS.

THE PROBLEM

We increasingly use AI for our cognitive tasks, and must therefore anticipate a future, where intellectual work will be purely recreational. The utility of human intellect is shrinking, and we risk losing our grasp on nature and technology.

OUR SOLUTION

It follows, that human intellect will only persist if the act of learning becomes recreational. In other words, to maintain our grasp on nature, we need to make it "fun" to learn STEM subjects.

We believe there are two key aspects in this endeavor:

1) Human to human teaching

Building a tutoring platform for students to meet with tutors and learn STEM

2) Continued sense of achievement

Using data from tutoring sessions to train AI to:

Formulate a step-by-step, gamified curriculum appropriate for the individual student.

The tutor will bring this curriculum to the student at each tutoring session.

To summarize, our product is a tutoring platform, boosted by generative AI, where tutors provide their students with AI-generated STEM-problems that are tailor-made for the individual student, making it as fun as possible to learn STEM.

FINANCIAL OVERVIEW

The company has steady, low-level revenue (20-30K monthly) Currently seeking funding from 'Novo Nordisk' and 'Lego' for initiation of bigger projects in the development of our language models.

MILESTONES

CVR registered - Website running - administrative software developed- 3-4 tutors hired - proof of concept, several sessions sold.

TARGET MARKET & CUSTOMERS

For 2026 the target demographic is highschool students within the capitol region of Denmark, Aiming for nation wide expansion in 2027.

CO-FOUNDER PROFILES WE ARE LOOKING FOR

Preferred qualifications

- Co-founder 1 (**Business profile**) Experience with growing a startup, attracting talent and raising capital.
- Co-founder 2 (**Programmer profile**) Experience with developing generative AI
- Co-founder 3 (**Marketing profile**) Experience with marketing for target demographic

Personal fit

- Passion for Science and technology is preferable. Someone who is interested in the positive use-cases of Artificial intelligence.

TASKS & RESPONSIBILITIES (FIRST 3 MONTHS)

Initially the task is to recruit tutors and sell sessions/punch cards. The business is expected to also be viable prior to AI initiatives. Once this is done, we set out to develop the AI

ACADEMIC & ENTREPRENEURIAL BACKGROUND OF CURRENT CO-FOUNDERS

- Current co-founder (**Science communication**) BSc physics, stud. MSc aerospace engineering.

PHYSICAL ADDRESS

Grønnegade 41, 1107 København K
